August 21st 1834

Is nearly all prairie being part of a very extensive plain called Hoosier prairie, it lies generally rolling, but not so as properly to be called hilly or broken, the soil is generally clay and a great proportion of it is good land and first rate, on the part are some small constant streams which appear to be supported by springs, having their rise in the prairie, and run northwards into the Calumie River. Timber bordering on the prairie is generally short & scattering, & mostly of the different kinds of oak common to be found in the western country.

I hereby certify that in pursuance of a contract with Micajah T. Williams Surveyor General of the United States, for the States of Ohio & Indiana, Territory of Michigan bearing date the Twenty first day of April 1834 and in strict conformity to the Laws of the United States, and the Instructions of the said Surveyor General, I have surveyed and subdivided into sections Township No thirty five North of Range^{No} Eight West of Second Meridian in the State of Indiana, and I further certify that the foregoing are the true and original field notes of said Survey & Subdivision, executed as aforesaid, Certified this 21st day of August 1834

William Clark
Deputy Surveyor

John Woolf
John Proctor } Chairmen
Barney Symes marker

T. 35 N. R. 8 W. 2nd Mer. Ind.

I certify, that the foregoing transcript
of field notes of Township 35 North of
Range 8 West, 2nd Meridian, State of
Indiana has been compared with the
Original in this office and found
to be correct.

William Johnston
Sur. Genl.

Surveyor General's Office
Cincinnati. Dec. 30th 1842
